User Guide

Git Connector v2.0

Getting Started

Welcome to the Git Connector User Guide. This document will help you set up and configure the Git Connector for your repositories.

Step 1: Install the Connector

Run: `pip install git-connector`

Step 2: Configure Authentication

Set your GitHub personal access token as an environment variable:

```
export GIT_CONNECTOR_TOKEN=your_token
```

Step 3: Connect a Repository

```
git-connector add https://github.com/user/repo.git
```

Supported File Types

- JSON (.json)
- HTML (.html)
- XML (.xml)
- Microsoft Word (.docx)
- PDF (.pdf)
- Plain Text (.txt)
- Markdown (.md)
